PERSONAL STATEMENT

I am a proficient Full Stack Developer with experience of specializing in MERN stack development. Proficient in React.js and Next.js, I have successfully delivered diverse projects that showcase my ability to create dynamic web applications. My expertise lies in crafting efficient and user-friendly interfaces while maintaining a strong foundation in both front-end and back-end development. I'm passionate about continuous learning and am eager to explore and master new technologies to further enhance my skill set and contribute to innovative projects.

SKILLS

- My proficiency extends to HTML5, CSS3, ES6 JavaScript, and a wide range of cutting-edge technologies and libraries, including Material-UI (MUI), Axios, Redux, Redux Toolkit, i18next, MongoDB, Mapbox GL, TypeScript, GraphQL, Apollo Client, and more.
- I've successfully tackled projects involving REST APIs, state management, and responsive design using Tailwind CSS and React Three Fiber for 3D graphics.
- My deployment experience includes Netlify and Vercel.
- I've worked with WordPress for content management.
- Proficient in collaboration and project management tools like Jira, Slack, and Trello.
- I excel at turning design concepts into functional applications using Figma and delivering high-quality solutions.

PROJECTS

I have built a variety of software projects that demonstrate my skills and experience in the field. Each project showcases my ability to develop, test, and deploy software that meets user needs and solves real-world problems. Through these projects, I have honed my programming skills, and I am constantly learning and exploring new technologies to improve my craft. I am passionate about using technology to create meaningful solutions, and I am excited to continue building innovative software projects in the future. To see my projects here's my portfolio where I showcase my projects.
