## SUMMARY

I am a full-stack software engineer with 5+ years experience building scalable and maintainable software applications using PHP/Laravel, NodeJs, React and WordPress. I enjoy solving problems and possess excellent communication and collaboration skills

## SKILLS

PHP/Laravel, Vue.js/React, Next.js, NestJs, WordPress (Theme & plugin development). MySQL, MongoDB, PostgreSQL, GraphQL, AWS, Docker, Git, TDD.

## EXPERIENCE

**DSTRCT Media**, Utrecht, Netherlands - Senior Software Engineer

Dec 2023 - Present

- Working with a team of developers, and media experts to build innovative software products for organizations
- Led the development of the company website v2 (Next.js & WP Headless API)
- Designed & developed the backend infrastructure for a patient feedback system for an hospital (NestJs, PostgreSQL, REST API)
- Building the backend service for an hospital management system (NestJs, PostgreSQL, GraphQL)

**Big Cabal Media**, Lagos, Nigeria - Senior Software Engineer

May 2023 - August 2023

- Managed a cross-functional team encompassing a product manager, systems engineer, full-stack engineers in maintaining existing wordpress based website infrastructure including adapting new sites, features and layouts. Conducted regular 1:1s with team members, evaluating projects timelines and status of existing development projects and provided detailed updates to the CEO & COO. Ensured uninterrupted operation of all company sites, achieving 100% uptime.
- Led collaboration with Systems engineer to transition deployment workflow from a self-hosted Git on AWS to GitHub. Implemented GitHub actions for CI/CD leading to a 100% boost in developers productivity.
- Conducted a comprehensive audit and optimization of company site, [Techcabal](#), resulting in a 200% increase in performance and speed
- Implemented and integrated Facebook Conversion API across company websites, leading to a significant 50% reduction in previous costs.

**BCT LTD**, Lagos, Nigeria - Software Engineer

January 2022 - May 2023

- Headed a 4-person backend team to develop an MVP for a sports management platform and freelancers marketplace ([Solvate Africa](#)), now with 1000+ active users.
- Optimized and added new features to the customer feedback system of a leading bank serving over 100k customers; achieved 99.9% uptime and reduced response time by 60%
- Revamped and deployed a B2B ride-sharing app ([Smoothride](#)) on app store, resulting in 90% increase in customer satisfaction rating and 100% faster loading times for its mobile and admin portals

**SAEDConnect**, Abuja, Nigeria - Backend Developer

February 2021 - January 2022

- Developed with a 3-person team an LMS WordPress theme ([Certifai](#)) and plugin ([MySkilli LMS](#)) that lets you create and manage schools, courses, enroll students, and process payments
- Built and implemented WordPress themes for clients some of which includes [valueminds.ng](#), [diberrconsulting.com](#), [diberracademy.com](#)
- Debugged and resolved issues. Successfully managed updates and version releases

**Medicomp Solutions**, Fairfax, USA - Software Engineer

August 2019 - December 2020

- Worked as a software engineer on an EHR project ([Medicomp Solutions](#))
- Integrated and implemented Dynamsoft scannerSDK that allows you connect to a physical scanner and transfer documents from the scanner to the application
- Refactored existing codebases and translated new design elements into reusable components

**AspireGate**, Bangalore India - Web Developer

June 2018 - August 2019

- Significantly contributed to project planning, scoping and architecture
- Translated PSDs into mobile responsive web UI using HTML, CSS, Javascript

## PROJECTS

---

**Solvate Africa** (React, Laravel): Designed and developed the backend architecture for a freelancer marketplace app, similar to Upwork. The platform allows creatives to bid on jobs and receive payment upon completion

**SmoothRide** (Laravel, MySQL): Optimized, deployed and maintained a B2B e-riding solution with 1000+ users, 100+ daily trips on Google Play Store. Supported and trained drivers on app usage

**ShipToNaija Portal** (React, Node.js): Designed database and system architecture for a logistics platform facilitating pick-up and shipping of goods between Nigeria and the United States

## EDUCATION

---

**B.Sc. Computer Applications**, Bangalore University, India (First Class Hons.)

June 2015 - July 2018

## OTHER

---

**Soft Skills:** Leadership, Empathy, Growth-mindset, Ownership, Kindness, Over Communication, Critical Thinking

**Languages:** English (native), Yoruba (native), Hindi (elementary), Kannada (elementary),
