EDUCATION

Bachelors in Computer Science

PMAS Arid Agriculture University,
Rawalpindi

07/2019 - 07/2023

3.6/4

Courses

- Artificial Intelligence
- Mobile App Development
- Computer Networks
- Compiler Construction

FSC. Pre-Eng

Punjab Group of Colleges. Bhara Koh,
Islamabad

05/2016 - 05/2018

865/1100

WORK EXPERIENCE

Software Engineer

Niftonic

05/2023 - Present

Islamabad

Niftonic is a cutting edge IT company that satisfies the customer's need by providing the services in Mobile and Web Development.

Responsibility

- My responsibilities involve developing and maintaining web applications using React.js, TypeScript, Firebase, Node.js and GraphQL.
- As a Software Engineer, I successfully managed multiple projects, consistently meeting deadlines while contributing to various development tasks.

Blockchain Intern

Bytewise Limited

03/2023 - 06/2023

Remote

Achievements/Tasks

- During a remote internship, I gained valuable experience and learned the fundamentals of Solidity, expanding my knowledge in blockchain development.

MERN Stack/ Blockchain Intern

EMRChains

01/2023 - 03/2023

Rawalpindi

EMRChains is an Electronic Medical Records system that aspires to bring revolution in the medical via blockchain technology

Responsibility

- During my internship in Blockchain/MERN, I extensively worked with Node.js, contributing to backend development, and further strengthening my expertise in full-stack development.
- I created APIs for patient, hospital, and medicine records, addressed frontend issues, and gained knowledge in blockchain technology.

TypeORM

PROJECTS

Alltrueistic (04/2024 - Present)

- The backend of the social media app built on Node.js, AWS infrastructure and GraphQL for data transport. I fixed existing backend issues and working on the version of the application.

Group it up (05/2024 - 05/2024)

- A platform for travel trips in groups. I worked on Stripe payments and endpoints for user credentials verifications.

Alltrueistic Admin (01/2024 - 04/2024)

- An Admin panel for Alltrueistic, a social media platform. The panel is built with React.js for the frontend, utilizing Material UI for styling, Zustand for efficient state management, Amplify for authentication, and Apollo Client for API integration.

TreeTalkTherapy (08/2023 - 12/2024)

- This is a therapy platform where clients can book and attend online sessions with the therapists. The session will be held via video calling session.
- I have built the app using ReactJS, implemented video calling using Zegocloud, real-time chat, Stripe payments and worked in firebase cloud functions. We are using Firebase as the backend.

BiDr TV LLC (07/2023 - 09/2023)

- BiDr is a bidding platform where sellers can auction their products via live streams and users can purchase these products by placing bid. It also has the Social media time-line, real-time chatting etc.
- I implemented the chat in this app. We are now building the backend using AWS Amplify and AppSync.

AlphaPaw (05/2023 - 07/2023)

- This is the app for veterinary app for online sessions between vets and consumer.
- I worked on three apps, Alpha Paw Consumer, Alpha Paw Vet and Admin.

Sentiment Analyst and Mood Companion (Web App) (10/2022 - 06/2023)

- This is our FYP in which we detect the emotional state of the user and then recommend content like videos, articles and songs etc. using AI and web scrapping to improve the emotional state of the user.
- In the same app we will providing a blog where users can share their thoughts and a chatbot that will act as companion to better the mood of the user.
