OBJECTIVE

Dedicated and detail-oriented Software Test Engineer with 2.8 year of experience in reviewing requirements, designing comprehensive test plans, and executing tests to ensure the quality and reliability of software products. Proficient in both manual and automated testing methodologies, with hands-on experience in Agile/Scrum environments. Skilled in identifying and documenting bugs, prioritizing testing activities, and collaborating effectively with cross-functional teams to deliver high-quality software solutions.

WORK EXPERIENCE

Dosepack LLP, Ahmedabad, Gujarat

Product Quality Analyst

Oct 2021 – Present

- Developed and implemented DOSEPACKER V3, V4, a revolutionary pharmacy automatic that streamlined LTC requirements for pharmacies in the USA.
- Reviewed requirements, specifications, and technical design documents to provide timely and meaningful feedback.
- Experience in Testing of both desktop and mobile applications
- Experience in functional testing in areas of web-based testing.
- Well versed in Manual testing technique and Methodology
- Extensively used manual test tools for functional testing & Regression testing.
- Experience in writing test strategy, test plan preparation & implementation, test case design, test tool usage, test execution, defect management & defect tracking.
- Experience in SDLC like Agile, Waterfall & V – model
- Extensively worked on various testing types such as Integration testing, Functional testing, Regression testing, Sanity testing, Smoke testing, GUI, UAT, Performance Testing with JMeter.
- Ability to successfully manage multiple deadlines & multiple projects effectively through a combination of business & technical skills.
- Proficient in requirements, Analysis, Documentation of Test strategies, Test plans, Test cases, Bug Tracking & Execution of projects with manual tools.
- Proven ability to work efficiently in both independent and team environments
- Good analytical & communication skills & ability to work independently with minimal supervision & perform as part of the team in order to complete testing projects and achieve project goals.

SKILLS

- Developed and maintained automated test scripts using Selenium WebDriver, Java, and TestNG, resulting in a 30% reduction in manual testing efforts.
- Reviewing requirements, specifications, and technical design documents.
- Prioritizing and planning testing activities, Creating detailed and well-structured test plans and test cases
- Experience working in Agile/Scrum development process
- Collaborated with cross-functional teams to identify test requirements and develop comprehensive test plans for new software features.
- Executed automated test suites and analyzed results to identify software defects, ensuring timely resolution and maintaining product quality.
- Conducted regression testing to validate software functionality and compatibility across different platforms and environments.
- Implemented continuous integration and continuous deployment (CI/CD) pipelines using tools such as Jenkins, Git, and Docker to automate the testing process.
- Experience in API Testing using Postman / SOAP UI

EDUCATION

Lovely Professional University – Jalandhar, Punjab

Bachelor of Engineering, Electrical & Electronics; Cumulative CGPA: 6.61/10.0

April 2021
