PROFILE and EDUCATION DETAIL

I am a **Software Engineer** from **Kohat University of Science and Technology**, Kohat, **graduating** from **2018 to 2022** with a **B+ grade** and a **CGPA of 3.26**, equating to **74%**.

My educational background **emphasized documentation**, recognizing the significance of this aspect in the software engineering domain.

Following the completion of my degree, I commenced **employment** with **Prismatic** as a **data entry specialist**. Concurrently, I **enrolled** in an **academy** to enhance my skills in the field of **web development**.

Subsequently, I underwent **a training program** with a software house to gain **practical experience** as a **front-end engineer**.

SUMMARY

Frontend Software Engineer with 9 months experience in HTML, CSS, JavaScript, Bootstrap, Tailwind CSS and React.js Proficient in creating engaging UIs, responsive web apps, and delivering high-quality projects on time. Adaptable problem-solver, committed to mastering new technologies rapidly. Strong communication skills, dedicated to client satisfaction, and passionate about driving project success through innovation and teamwork.

TECHNICAL SKILLS

Front-End Development: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript and React Js

Developer Tools: Git/GitHub

Programming Language: JavaScript

EXPERIENCE

Front-End Developer (Internee) at Alright Tech, Islamabad, PK

May-2024 – Present

- Develop and maintain responsive web apps with JavaScript, React.js, and Tailwind CSS
- Work closely with backend developers to integrate frontend components with server-side logic.
- Collaborate with UX/UI designers to transform wireframes and prototypes into functional, visually appealing web interfaces

Front-End Developer (trainee) at Eziline Software House, Rwp, PK:

Aug-2023 – Dec-2023

- During this training, I acquired practical experience through various projects, demonstrating my proficiency in HTML5, CSS3, Bootstrap 5, Tailwind CSS, JavaScript, and React JS.
- The projects encompass a variety of applications, ranging from static web pages to dynamic ones with advanced features such as API integration, routing, and state management using React JS.

PROJECTS

- <https://nexus-aquarium.vercel.app/> (Fully Responsive React Js and Tailwind CSS web app)
- <https://crud-app-bay.vercel.app/> (CRUD app using React Js, Tailwind CSS and Fake API)
- <https://buildnox.vercel.app/> (Fully animated web app using HTML and CSS)
- <https://microsoft-clone-two.vercel.app/> (Fully Responsive website using HTML CSS and media query)
- ...and many more, such as a Joke Generator using an API, a Password Generator, an advanced To-do app with local data storage, and a Shopping website with Context API.
