SUMMARY

A self-motivated enthusiastic and self-driven junior software developer eager to learn and contribute to projects, with a strong foundation in programming and a passion for software development.

At present, actively seeking a junior software developer/software engineer role in a reputable company, driven by determination and in a reputable eagerness to learn and contribute to a team.

EXPERIENCE

Jr Software Developer Queper Technologies

Involved in developing, designing, testing, and implementing scalable business solutions.

- In my role as a software developer, I have had the opportunity to create a diverse range of applications and websites, each tailored to unique needs and objectives.
- I've immersed myself in every aspect of the development process. With a keen eye for detail and a commitment to excellence, I ensure that each application not only and detail-oriented approach.

Web App Developer Queper Technologies

Developed an image utility for use within organization.

- From conception to deployment, I've led projects that have pushed the boundaries of what's possible on the web. With a keen understanding of user experience principles and a passion for clean, maintainable code, I've collaborated with cross-functional

PROJECTS

Auto Electronics Project

2024 Punjab

Making Website Implementation :

- In my journey, a standout achievement was the creation of the comprehensive online presence for Auto Electronics. From inception to execution, I orchestrated every aspect of the project, from designing the layout to coding the functionality ensuring a seamless and user-friendly experience. This project not only showcased my technical proficiency but also demonstrated project not only my ability to translate into a cohesive and impactful digital solution.
