Professional Summary

Solution Architect with extensive techno-functional expertise and over 4.5 years of experience in implementing and customizing ERP systems, with a specialization in Odoo. Proficient in Python development, API integrations, and end-to-end ERP solutions tailored to client-specific needs. Successfully led large-scale implementations for industries such as manufacturing, distribution, and retail, including a landmark Odoo deployment for KEIMED, serving over 4000 users. Adept at aligning ERP systems with business processes to enhance operational efficiency, streamline workflows, and improve decision-making.

Work Experience

Implementation Consultant & Solution Architect, Odoo In

June 2023 – Present, India

- Spearheaded multiple Odoo ERP implementations, including a large-scale deployment for KEIMED, customizing modules to optimize supply chain and distribution processes for over 4000 end users.
- Developed and deployed Python-based customizations in Odoo Studio, integrating modules for sales, inventory, manufacturing, and finance.
- Integrated third-party applications with Odoo using RESTful APIs to ensure seamless data exchange and interoperability with platforms such as Flipkart, Apollo, and Amazon.
- Designed and implemented automation workflows, real-time inventory management, and robust reporting solutions using Python and Odoo frameworks.
- Collaborated with clients to gather requirements and deliver ERP solutions tailored to their operational goals.

Application Lead Consultant, Aliter Business Solution

Jan 2021 – May 2023, Mumbai

- Led the end-to-end Odoo implementation for PharmEasy, integrating IoT/IIoT for warehouse automation and real-time monitoring.
- Enhanced ERP functionality with API integrations, streamlining communication between Odoo and external systems such as payment gateways, logistics platforms, and CRM tools.
- Delivered custom Python scripts to automate data migration and improve system performance during ERP transitions.
- Managed SAP integrations for manufacturing clients, focusing on production planning and finance modules.

Sr. Techno-Functional Leader, Lighthouse Info Systems

Jan 2020 – Jan 2021, Nagpur

- Delivered Oracle and Odoo ERP solutions for manufacturing firms, aligning systems with business-specific requirements for improved efficiency.
 - Customized Odoo modules for manufacturing and finance, implementing advanced Python-based features to enhance functionality.
 - Built custom APIs to integrate ERP systems with legacy tools, enabling seamless data exchange and process continuity.
-

Education

Bachelor of Engineering in Mechanical Engineering

ITER S'O'A University, June 2015 – December 2019

- Specialized in automation systems design with a strong focus on process optimization.
-
