Aneeq Akbar

Full-Stack Lead Engineer | Architecting Modern Web Solutions |
Tech Enthusiast
Karāchi, Sindh, Pakistan

Summary

~"If we don't discipline ourselves, the world will do it for us."

I am a skilled full-stack web developer and lead engineer with a proven track record of delivering scalable and robust solutions that drive business growth. Most recently, I worked with a small business to design a cutting-edge React.js frontend and develop a Django backend, resulting in an 80% sales increase.

In addition to technical expertise, I excel in team leadership, project management, and architecture design, ensuring that projects are delivered on time and aligned with business goals. My solid understanding of Agile methodologies, CI/CD pipelines, and DevOps practices allows me to guide teams through the full development lifecycle, from ideation to deployment.

In my free time, I love digging deeper into programming concepts and exploring how things work internally. For fun, I even create my own programming languages—not for large-scale use, but as a way to experiment and push my technical boundaries.

Technologies that I like to work with:

Leadership & Collaboration:

Team management, mentoring, and code reviews
Agile project management and sprint planning
Effective cross-functional communication with stakeholders
Decision-making in software architecture and system design

Front-end development

React.js, Next.js
Redux, Flux
GraphQL,
Bootstrap, Tailwind CSS, Material UI, Chakra UI, CSS3

Back-end development

Node.js, Express.js, Nest.js, Django

Docker, Docker-compose

Celery, Redis, RabbitMq

Database

Relational database: PostgreSQL, MySQL, MariaDB, SQLite

NoSQL database: MongoDB, Firebase Realtime Database

System Architecture & DevOps:

Scalable system design

CI/CD pipelines (Jenkins, GitLab CI)

AWS, Azure, GCP cloud architecture

Containerization and orchestration (Docker, Kubernetes)

Monitoring and logging

Additional Expertise:

API reverse engineering

Message queues (RabbitMQ, Kafka)

Scalable microservices architecture

Load balancing and auto-scaling

I bring both technical and strategic insight to each project, ensuring not only that solutions are technically sound but also aligned with business goals. Let's collaborate to deliver the next big thing for your business!

Experience

QLU.ai

1 year 3 months

Lead Full Stack Engineer

June 2024 - Present (8 months)

Karāchi, Sindh, Pakistan

Coding.

Fiverr

Full Stack Engineer

January 2021 - November 2023 (2 years 11 months)

Karāchi, Sindh, Pakistan

Responsibilities:

Developed websites from scratch and updated existing sites using Django or Python.

Created high-quality Restful APIs in Python for seamless data exchange.

Implemented Restful API endpoints in plain Python or utilizing Django Rest Framework (DRF).

Developed high-quality web sockets to facilitate real-time communication.

Designed and implemented high-quality dashboards in Django for data visualization.

Integrated payment gateways including Stripe, Paypal, and custom solutions to facilitate online transactions.

Crafted beautiful, responsive, cross-browser/multi-device compatible, and SEO-friendly designs/UI using Bootstrap and Plain CSS3.

Identified and resolved bugs and issues to ensure smooth website functionality.

Skills Utilized:

HTML5

CSS3

JavaScript

Python

Django

Django REST Framework

MySQL / SQLite / PostgreSQL

Redis

DevOps

Achievements:

Successfully completed 100+ projects meeting client requirements and deadlines.

Received positive feedback from clients for delivering high-quality work at an affordable rate.

Improved website performance and user experience through efficient coding practices and optimization techniques.
