EXPERIENCE

BroadPeak Technologies — Islamabad — QA Engineer

JULY 2024 - Present

As a QA Engineer, I am working on the E-Commerce product. My day to day task include functional testing, sanity testing, User Acceptance Testing and automation testing. Writing test cases based on the user stories assigned to me and executing test cases, detecting and collaborating bugs with the developers for smooth bug resolution and work for better user experience.

Pakistan Revenue Automation Limited — Islamabad — Junior QA Engineer

MARCH 2023 - JUNE 2024

In this role I developed the testing skills by working on the IRIS 2.0 and IRIS 1.1 system. Performed manual testing, functional testing, api testing and load testing using Jmeter to check the efficiency and resiliency of the apis. Conducting load testing and stress testing played critical role to enhance performance by upto 20%.

PAF, Location — Software Developer

OCTOBER 2020 - FEBRUARY 2023

Worked as a Software Engineer in PAF on the critical software systems.

EDUCATION

FAST NUCES, Islamabad — BSCS

AUGUST 2014 - JANUARY 2019

I have done Bachelors in Computer Sciences.

CERTIFICATION

Software Quality Assurance Engineer — Dice Analytics

Learned software testing concepts, API testing and automation testing with selenium.
