📍 Islamabad, Pakistan

SUMMARY

Results-driven QA Automation Engineer with expertise in Cypress, JMeter, and API testing using Postman. Proven ability to enhance software reliability, optimize performance, and seamlessly integrate testing into CI/CD pipelines. Proficient in Agile methodologies, with expertise in test case management tools such as Jira and ZenTao.

EXPERIENCE

QA Engineer

Parashoot

📅 09/2023 - Present 📍 Islamabad, Pakistan

A company focused on developing cutting-edge software solutions.

- Performed **comprehensive functional, regression, and usability testing** using **Cypress with Cucumber framework** to ensure software reliability and user experience.
- Tested various **payment methods**, identifying and resolving critical transaction issues.
- Conducted **performance and load testing** using **JMeter** to detect bottlenecks and enhance application scalability.
- API testing** using **Postman**, to validate system integrations and ensure functional performance.
- Utilized **Jira and Zentao** for efficient **test case management, bug tracking, and sprint planning**, ensuring seamless collaboration and timely resolution of defects.

QA Engineer

Ample soft

📅 01/2023 - 05/2023 📍 Islamabad, Pakistan

Remote based software development company

- Developed detailed **test cases and test plans** using **Google sheets**, enhancing testing efficiency, coverage, and alignment with project requirements.
- Reported bugs** and tracked defects using **Jira** ensuring clear documentation and efficient resolution.
- Collaborated with cross-functional teams** to ensure test coverage aligns with product specifications, leveraging for test documentation and knowledge sharing.
- Performed **end-to-end testing** on Mobile and Web applications.
- Performed database testing** using **SQL** to validate data integrity, accuracy, and consistency by executing complex queries, ensuring that the application functions correctly with the underlying database.

QA Internship

Business Incubation Center, IIUI

📅 06/2022 - 09/2022 📍 Islamabad, Pakistan

An incubator focusing on business ideas and software development.

- Understanding of SDLC models** (Agile, Waterfall, V-Model) and **Bug Life Cycle**, ensuring alignment with project workflows and timely issue resolution.
- Inspected and reviewed project documentation** using **SharePoint** to ensure compliance with business and technical requirements.
- Developed test plans, use cases, test cases and bug reports** ensuring thorough test coverage and clear issue tracking.
- Collaborated with development and product teams** to ensure accurate understanding of requirements and seamless execution of testing processes.
- Performed **Smoke, Sanity, and Regression testing** across iOS, Android, and web applications.

EDUCATION

Bachelor of Science in Computer Science

International Islamic University Islamabad GPA: 3.54/4.00

📅 09/2019 - 06/2023 📍 Islamabad

SKILLS

Test Automation & Framework

Cypress **Cucumber (Gherkin)** **JMeter (Performance & Load Testing)** **Postman (API Testing)**

Testing & QA Methodologies

Manual Testing **Automation Testing** **Functional Testing** **Regression Testing** **Smoke Testing**
Sanity Testing **Database Testing** **Performance Testing** **Load Testing** **Game Testing** **API Testing**
Agile (Scrum/Kanban) **Documentation & user manuals**

CI/CD & DevOps

Git **Gitlab CI/CD** **Jenkins CI/CD pipelines & automation**

Database and Scripting

SQL (Database Testing) **JavaScript (Scripting for Cypress)**

Project Management & Bug Tracking Tools

Jira **ZenTao** **GitHub** **Bugzilla**
