## SQA ENGINEER

Dedicated SQA Engineer with over a year of experience. Successfully implemented robust testing processes and methodologies, enhancing product quality and client satisfaction. Managed and delivered multiple projects for international clients, showcasing strong adaptability and consistently exceeding expectations in fast-paced environments.

---

## SKILLS AND EXPERTISE

- Functional and non Functional Testing
- Manual / Automation
- DevOps/Qase/Notion/Jira/Trello
- Scrum
- Test Plan / Test Case
- Compatibility Testing
- Selenium with Java
- Bug reporting
- Burp suite basics "Security"
- Agile Software Development
- Cross Browser Testing / API Testing / Swagger / Postman
- Performance Testing J Meter
- Testing Methodologies

---

## PROFESSIONAL EXPERIENCE

### Sumato Solutions SQA Engineer

March 2024 - Present

- Developing and executing formal test plans to ensure quality of software
- Documenting software defects using a bug tracking system
- Gather the software requirement from the client and implement it according to the client requirement
- Analyzing test results and recommending corrective actions
- Providing technical support for software applications
- Performance and API testing on all application with different domains

### Devbatch

December 2022 - March 2024

### SQA Engineer

- Daily routine was to test web application compatibility and performance to recommend cross browser compatibility improvements to the web development team.
- Day to day collaborate with developers, system installers, and technical support representatives to identify errors and determine the appropriate team to consult for issue resolution.
- Report and prioritize bugs identified during testing activities.

## **Datics AI Trainee SQA**

- Understand the software testing principles.
  - Learned about the software development and testing life cycles.
  - Automation with Selenium and proficiency in web automation.
  - Developed skills in identifying bugs and creating test strategies.
  - Grasping basic programming concepts.
  - Learned API testing using Postman.
- 

## **PROJECTS**

### **Mobile App Testing, Web App Testing Saudi Health Care Company**

- Analyze project requirements and share findings with stakeholders.
- Coordinate with the Design Department to create designs.
- Tested iOS App for functionality, usability, and performance.
- Create test cases covering various scenarios.
- Execute test cases and document results.
- Collaborate with developers to resolve issues.
- Provide feedback for design and functionality improvements.
- Conduct regression testing to ensure new developments don't affect existing functionality.
- Contribute to process improvement discussions.
- Generate reports summarizing test results.
- Participate in project meetings to provide insights and contribute to planning

### **Web App Testing Canadian Airline Company**

- Analyze project requirements and share findings with stakeholders.
- Coordinate with the Design Department to create designs.
- Tested functionality, usability, and performance.
- Create test cases covering various scenarios.
- Execute test cases and document results.
- Collaborate with developers to resolve issues.

### **Web App Testing and Mobile Testing ERP**

- Performed regression testing according to stakeholder requirements
  - Executed functional testing
  - Conducted integration testing
  - Completed system testing
  - Perform API testing and Load Testing
- 

## **EDUCATION**

### **Bachelor in Computer Science**

HITEC University Taxila Cantt (2022)

### **FSC Pre - Engineering**

Sir Syed College Wah Cantt (2018)

### **Matric**

HITEC Margalla Campus Taxila Cantt
