PROFILE

I am a BS(CS) graduate from COMSATS Islamabad with approximately **1 year of industry** experience. Proficient in developing responsive web applications using **ReactJS**, **Redux Toolkit**, and **Node.js**, with a strong grasp of **MongoDB** and **Express.js** for efficient backend solutions. Skilled in building **RESTful APIs**, implementing user authentication, and optimizing performance with caching strategies like Redis. Experienced in state management, integrating third-party APIs, and maintaining clean, reusable code following best practices. Excited to leverage my skills in a challenging industry role and contribute to impactful projects!

EDUCATION

BS in Computer Science

Comsats Univeristy Islamabad
CGPA: 3.09

Feb 2021 – Jan 2025
Islamabad, Pakistan

PROFESSIONAL EXPERIENCE

Webrange Solutions

MERN Stack Developer

Jun 2024 – present
Islamabad, Pakistan

- Collaborated closely with designers to achieve pixel-perfect UI implementations in web applications using **ReactJS**, **Shadcn**, **MaterialUI**, and **TailwindCSS**, maintaining a high standard of attention to detail.
- Developed responsive designs for web and mobile using media queries, enhancing navigation and user experience across various devices.
- Worked effectively with **cross-functional teams**, including **mobile app developers** and **UI/UX designers**, ensuring seamless integration and consistency.

Cyber Evangelists

Full Stack Developer

Jan 2023 – Mar 2023
Remote

- Engaged in **full-stack development** using **Next.js**, **FastAPI**, and **Python**.
- Leveraged **Docker** to create reproducible environments, facilitating efficient collaboration among development teams.

LANGUAGES & TECHNOLOGIES

Programming Languages

JavaScript, TypeScript, Python, Java, C++, C

Frontend Technologies

ReactJS, MaterialUI, Shadcn, ChakraUI, TailwindCSS, Bootstrap

Backend Technologies

Nodejs, Nextjs, Firebase, Django, FastAPI

Databases

Mongodb, MySQL, Oracle

Cloud Computing

AWS(EC2 instance, S3, lambda, load balancers, IAM, Route 53)

PROJECTS

Vupop

Contributed to the web and backend of a sports-focused platform that allows fans to upload videos, editors to customize content, and broadcasters to manage subscriptions and video exports with dynamic pricing. Designed multi-role functionalities for admins, editors, and broadcasters, supporting video editing, invoicing, and user licensing to boost engagement and monetization.

Wodpro League

Developed the **backend and admin panel** for WodproLeague, an **athlete league in Spain**. Implemented **video upload verification**, allowing admins to **correct and approve results**, ensuring accurate scoring and data integrity.

PRISM

Final Year Project

Developed **PRISM**, a blockchain-powered **job marketplace and social media platform** ensuring **transparency, trust, and secure transactions**. Integrated **AI-driven job search**, **cryptocurrency payments**, and **data privacy measures** to enhance user experience and engagement.

AWARDS

Huawei Innovation Challenge 2024-25

First Position in the ICT Competition 2024-25, Middle East and Central Asia.

Visio Park 2024

First Position in the Software Project Category, Visio Park 2024, COMSATS University Wah Campus
