

FARHAN AMJAD

SOFTWARE QUALITY ENGINEER

PROFILE

I am a dedicated and detail-oriented Software Quality Engineer with a strong focus on ensuring software excellence and delivering high-quality user experiences. I have extensive experience in analyzing requirements, designing comprehensive test plans, and executing both manual and automated testing to identify and resolve defects effectively. My expertise spans across functional, regression, integration, and performance testing, utilizing tools such as Selenium, JIRA, and Postman. I have a solid understanding of Agile and Waterfall development methodologies and excel at collaborating with cross-functional teams to enhance product quality.

EXPERIENCE

2022 - 2024	<p>Fauji Foundation Head Office Rawalpindi <i>Software Quality Engineer, Rawalpindi</i></p> <p>As an SQA and Web Development at FFHO, I gained dual experience in ensuring software quality and developing responsive websites. In the SQA role, I created and executed test cases, identified and documented defects, and performed manual and regression testing using tools like JIRA. Simultaneously, as a Web Developer, I designed and developed user-friendly websites, optimized performance, and ensured cross-browser compatibility while utilizing technologies such as HTML, CSS, JavaScript, and React. This combined experience strengthened my skills in software testing and web development, along with collaboration and problem-solving.</p>
2021 - 2022	<p>Military College of Signals, NUST <i>Quality Assurance, Rawalpindi</i></p> <p>Gained practical experience in developing and executing test cases, identifying bugs, and ensuring software quality through manual testing. I collaborated with cross-functional teams to improve functionality, performed regression testing, and documented issues using tools like JIRA, enhancing my understanding of quality assurance processes and methodologies</p>
2021 - 2021	<p>Ulter Tech Pvt Ltd. <i>Web Developer Internee, Islamabad</i></p> <p>Contributed to designing and developing user-friendly websites, writing clean and efficient code, and optimizing web performance. I collaborated with teams to implement responsive designs, debugged issues, and ensured cross-browser compatibility while enhancing my skills in PHP, HTML, CSS, JavaScript, and frameworks like React.</p>
2018 - 2018	<p>Aplome Software House <i>Software Testing Internee, Islamabad</i></p> <p>Gained hands-on experience in creating and executing test cases, identifying and documenting defects, and performing functional and regression testing.</p>

EDUCATION

2024 - Present	MS in Software Engineering <i>Military College of Signals, NUST, Rawalpindi</i>
2018 - 2022	BS in Computer Science <i>Capital University of Science and Technology, Islamabad</i>
2016 - 2018	ICS (Physics, Maths, Comp Sci) <i>Punjab Group of College, Rawalpindi</i>
2016	Matric <i>Fauji Foundation School, Rawalpindi</i>

SKILLS

Skill group

Manual testing.

Test case creation and execution.

SQL for backend and data validation testing.

Familiarity with testing tools like JIRA, Selenium, and Postman.

Skill group

Knowledge of Agile, Scrum and Waterfall development methodologies.

Defect identification, tracking, and reporting.
