| • Introduction to HTML                       | • Graphic Design  |
| • Jenkins: Automating your delivery pipeline | • Ecommerce Management                                    |
| • Terraform for absolute beginners           | • WordPress   |

## **PROJECTS**

### **Capital Constructors and Builders**

<https://ccb-website.vercel.app/>

- Built a MERN-based ERP system to manage construction projects and company operations.
- Integrated modules for project tracking, financial management, and inventory control.
- Provided real-time reporting and analytics for improved decision-making.

### **Video Background Changer**

<https://videobackgroundchanger.com/>

- Develop the application using React framework for building user interfaces.
- Utilize APIs for processing video and image data.
- Users can choose to replace the background with a custom photo from their device or select from

pre-defined backgrounds.

- Ensure smooth and real-time processing of the video feed for seamless background replacement.

### **Subject Guides**

<http://213.199.59.195:8889/>

- Empowers content creators to share their knowledge through guide creation across multiple subjects.
- Developed using the React and Laravel.
- Provides a user-friendly and interactive interface for Guide creation.
- Leverage an asset to handle videos, links, documents, books, photos

### **Code Knitters Website**

<https://codeknitters.co/>

- Developed using the React.js
- Provides a user-friendly and interactive interface for organization
- Company Portfolio website

### **Antennatec Website**

<https://antennatec.com/>

- Developed using the React.js
- Provides a user-friendly and interactive interface for organization

### **NoteBook Website**

- Developed using the MERN stack (MongoDB, React, Node.js)
- Integrated with MongoDB for data storage and retrieval
- Allows users to create, edit, and organize digital notebooks
- Provides a user-friendly and interactive interface for note-taking and organization

### **NewsMonkey Website**

- Developed using React
- Integrates the NewsAPI for real-time news updates
- User-friendly interface for browsing news articles
- Allows users to filter news articles by categories
- Provides an up-to-date and convenient news reading experience

### **TextUtils Website**

<https://text-utils-beige-rho.vercel.app/>

- Built using React
- User-friendly interface for text manipulation
- Features include converting text to lowercase and uppercase
- Provides a text character count functionality for user convenience

### **Learning Management System Website**

- Learning Management System (LMS) Website developed using PHP
- Integrated with MySQL database using XAMPP
- User-friendly interface for students and instructors
- Robust features for course creation, enrollment, progress tracking and chat between Students and teachers.
