- Utilized Trello to log and track the software bugs.
- Worked closely with SDLC model and Agile.
- Create documentations of the projects (User Manual, Release Notes, Story Boards).
- Communicated findings to development teams for issue resolution.
- Collaborated in meetings to discuss project progress and challenges.
- Give presentations to the team and demonstrations to the client.

### PROJECTS

#### Tealpot

A freelancing web and mobile application designed to connect buyers and sellers. The project involved developing both a responsive website and a mobile app. The platform features distinct interfaces for sellers to offer services and buyers to search and purchase them.

#### Thessa B2B

An online business platform catering to B2B transactions. Users can register as sellers through an admin site, while the main site is designed for customers to explore and engage with the platform's offerings.

#### NextEats

A web-based restaurant management system comprising two modules: an admin site for managing restaurant operations and a restaurant site for customers to explore menus, place orders, and make reservations.
