Abdul Sami

Full Stack Developer (MERN)

I am a MERN stack developer with over 2.5 years of experience designing and building robust web applications. Proficient in leveraging MongoDB, Express.js, React, Next.js, and Node.js to deliver scalable solutions tailored to client needs.

WORK EXPERIENCE

Full Stack Developer Synapsify

12/2024

Islamabad

Achievements/Tasks

- I am responsible for the front-end development of a sophisticated accountancy tool aimed at providing seamless financial management for businesses and individuals.
- Utilizing React to build dynamic, responsive, and interactive user interfaces.

Frontend Developer Decimal Solutions

02/2024 - 12/2024

Islamabad

Achievements/Tasks

- Developed and optimized user interfaces for web applications using React, Next.js, and TypeScript within the MERN stack, ensuring responsive and seamless user experiences.
- Collaborated with UI/UX designers to transform design mockups into interactive, user-centric components, following best practices for accessibility and performance.

Full Stack Developer Blue Bird

10/2022 - 02/2024

Rawalpindi

Achievements/Tasks

- Developed a real estate web application with three user roles: Admin, Agent, and User.
- Implemented user authentication, role-based access control, and CRUD operations for property listings.

PROJECTS

AccountsInc

- Developed a SaaS accountancy tool designed to streamline financial data processing by converting Excel sheets into custom formulas. The tool simplifies accounting workflows, enhances accuracy, and saves time by automating complex calculations, providing businesses with a more efficient way to manage and analyze financial data.
- Tech: MERN

Real Estate Listing Portal

- Developed a real estate listing application featuring a robust user management system with multiple user roles. The platform enables users to register, sign in, and post property listings, while multi-level admins can manage, review, and moderate those listings. Focused on secure authentication, role-based access control, and scalable architecture.
- Tech: MERN

Car dealership system

- worked on end-to-end Car Dealership System for the U.S. market, covering the complete vehicle lifecycle from auction acquisition to repairs, bank financing, showroom listing, and final sale to customers. The system details every stage, enabling seamless coordination between departments and ensuring transparency, efficiency, and accountability across the dealership workflow.
- =Tech: MERN stack

EDUCATION

Bachlors in Computer Science Iqra University

CGPA -3.0
