ABOUT ME

I am a dedicated Software Engineer with over a year of professional experience specializing in backend development. My primary focus is on building robust and scalable backend systems using Node.js and Express, with a strong commitment to ensuring data security and optimizing performance. In addition to my backend expertise, I have hands-on experience in mobile app development using Flutter, where I have developed user-friendly and efficient mobile applications. I am also skilled in software quality assurance, conducting thorough manual and automated testing with a focus on API testing, to uphold high standards of software quality and reliability. I recently completed my Bachelor's degree in Software Engineering from Comsats University Islamabad, Abbottabad Campus, and am eager to apply my skills to a challenging software development role where I can make impactful contributions to the team.

WORK EXPERIENCE

20/08/2023 – CURRENT Abbotabad, Pakistan

Software Quality Engineer Todds Group

- Conduct manual and automated testing for applications, with a focus on API testing using tools like Postman.
- Participate in code reviews and quality checks, ensuring best practices in software development.
- Maintain documentation and testing protocols for continuous improvement in software quality and reliability.

02/07/2024 – CURRENT Lahore, Pakistan

Backend Developer (Remote) Social Swirl

- Develop RESTful APIs using Node.js and Express to enable efficient data handling across applications.
- Collaborate with front-end developers to create and integrate backend solutions that enhance application performance and scalability.
- Implement secure authentication and authorization mechanisms to protect sensitive user data.

04/01/2023 – 06/04/2023 Abbotabad, Pakistan

Junior Flutter Developer Geeks Hub

- Developed mobile applications with Flutter, focusing on integrating Firebase services for authentication and data management.
- Assisted in creating responsive user interfaces and implementing app functionalities to ensure a seamless user experience.
- Collaborated in cross-functional teams to troubleshoot and resolve app performance issues.

EDUCATION AND TRAINING

02/09/2019 – 10/08/2023 Abbotabad, Pakistan

Bachelor of Software Engineering Comsats University
Islamabad, Abbottabad Campus

I have completed working on my final year project, which is an Android application for Handwritten Signature Forgery Detection using CNN (Convolutional Neural Networks) with 3 different CNN architectures.

Website <https://www.cuiatd.edu.pk/> | **Field of study** Software and applications development and analysis , Information and Communication Technologies (ICTs) not further defined | **Final grade** 83% | **Thesis** Android application for Handwritten Signature Forgery Detection using CNN

LANGUAGE SKILLS

MOTHER TONGUE(S): Pashto

Other language(s):

English

- Listening C1
- Spoken production B2
- Reading C1
- Spoken interaction B2
- Writing B2

Urdu

- Listening C2
- Spoken production C2
- Reading C2
- Spoken interaction C2
- Writing C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

Intermediate Flutter | SQL | application development | MySQL | JavaScript | JSON | Javascript(Nodejs, ExpressJs) | JI
R | Java | Git | Firebase | C++ | Node JS | Backend
