|                            | • Problem Solver | • Creativity & Innovation | • Quick Learner   |

## Experience

### NADRA Headquarters, G-5

July 2023 – August 2023

*Android Developer Intern*

*Islamabad, Pakistan*

- Developed a production-tracking dashboard Android application using Java, enabling efficient monitoring and tracking of production data.
- Integrated MS-SQL Database into the Android application for real-time updates, ensuring seamless data synchronization.
- Collaborated with experienced developers at NADRA, gaining practical experience in application design, development, and implementation.
- Demonstrated strong teamwork and communication skills in a collaborative environment, enhancing proficiency in Java programming and Android development.

## Education

### Shaheed Zulfiqar Ali Bhutto Institute of Science & Technology University - H-8/4

Sep 2020 - Sep 2024

*Bachelor of Science in Software Engineering*

*Islamabad, Pakistan*

### Islamabad Model College for Boys - H-9

2018 - 2020

*Intermediate in Computer Science*

*Islamabad, Pakistan*

### Islamabad Model School for Boys - I-8/4

2018

*Matriculation*

*Islamabad, Pakistan*

## Professional Projects

### mailculator.vercel.app | *React.js*

May 2025

- Built a web application using React.js to perform and share calculations via Email and WhatsApp.
- Integrated EmailJS for email functionality and used Local Storage to retain user input for better usability.
- Deployed the app on Vercel for fast global access and optimized client-side performance.

### websitemarketingmasters.co.uk | *Next.js*

Jan 2025

- Developed a dynamic marketing agency website using Next.js for fast load times and optimal performance.
- Ensured a responsive design for a seamless user experience across all devices.
- Optimized the site to enhance online visibility and improve client engagement.

### Sentiment Analysis for YouTube Smartphone Reviews (FYP) | *Python, MERN Stack*

Sep 2023 - July 2024

- Developed an E-commerce system incorporating sentiment analysis on smartphone reviews extracted from YouTube videos.
- Utilized DeBERTa model for aspect-based sentiment analysis, processing video transcripts into individual sentences for feature extraction.
- Generated comprehensive reports detailing sentiment scores (1-10) associated with various smartphone features.
