## Professional Summary – Automated Testing

- **ISTQB-certified tester** (GASQ Service GmbH) with hands-on experience in **software testing** and **automation**
- Proficient in test automation using **Selenium, Java, TestNG, Maven, Page Object Model (POM), TDD**, and **BDD with Cucumber**
- Skilled in **API testing** using **Postman** and **REST Assured**, including automation with **POJO** and **BDD frameworks**
- Strong programming knowledge in **Java**, with expertise in **OOP concepts, Collections**, and **String handling**
- Experienced in **XPath, iFrame handling, wait mechanisms, popups**, and **dropdown management**
- Good command of **UNIX commands** for **server-side** and **database-level analysis**
- Domain experience in **Finance** and **Telecommunications**

## Professional Summary – Manual Testing

- Expertise in designing **test cases** and **test data** based on **client requirements**
- Performed **functional testing, regression testing, retesting**, and **defect analysis**
- Solid understanding of **software development, test design**, and **test automation** processes
- Collaborates effectively with stakeholders for **test planning** and **execution**
- Knowledge of **testing concepts, types, tools**, and **agile methodologies** like **Scrum** and **Kanban**
- Hands-on experience with **JIRA** for **project management** and **bug tracking**
- Skilled in **agile processes** and **database testing** using **MySQL**
- Experience with **HP ALM 12.5** and **JIRA** for **defect management** and **test status reporting**
- Proficient in creating **traceability matrices** to align **business requirements** with **test cases**
- Conducted **System Integration Testing (SIT)** including **functional** and **regression testing**
- Utilized **Charles Proxy** for **debugging** and issue analysis in **agile environments**
- Strong **organizational** and **analytical skills**, able to perform under **pressure and tight deadlines**

## Employment

Jun 2020 - Apr 2024

■ **Software Test Engineer**  
**PayTM Software, Mumbai, India**

### 1. Paytm Insurance Broker

- Tested **end-to-end insurance workflows** for products across **Two-Wheeler, Four-Wheeler, Health, and Life Insurance**
- Performed **functional, regression, and integration testing** to ensure product reliability and compliance with **IRDAI** standards
- Collaborated with developers and business teams to validate policy data and improve **test coverage**
- Supported **test automation** using **Selenium, Java**, and **TestNG**

### 2. PG – Deduction Service (Payment Gateway)

- Tested key deduction services such as **chargeback, reclaim, repayment, recovery**, and **refund** flows
- Validated secure **transaction flows** between **merchant** and **internal accounts**
- Conducted **API testing** using **Postman** and performed **debugging** with **Charles Proxy**
- Ensured quality through detailed **test case design, bug reporting**, and coordination with cross-functional teams

Education

2019

■ Master of Technology - Computer Science

2017

■ Bachelor of Engineering – Computer Science & Engineering

Languages

English

German

IT Skills

■ Test Automation

Selenium with Java (TestNG, Maven, Page Object Model – POM, Cucumber BDD, TDD)

■ API Testing & Automation

Postman, REST Assured, POJO, SOAP UI

■ CI/CD & DevOps

Jenkins, GitHub, basic knowledge of Docker

■ Scripting & Debugging

XPath, iFrame handling, wait conditions, popups, dropdowns, Charles Proxy

■ Manual Testing

Functional & non-functional testing (Regression, Re-tests, Sanity), exploratory testing

■ Test Design & Strategy

Test case design, test planning, test strategy development

■ Defect & Test Management

JIRA, HP ALM

■ Database Testing

MySQL, SQL queries

■ System Integration Testing (SIT)

End-to-end system and data flow validation

■ Agile Methodologies

Agile testing, Scrum

■ Tools & Technologies

Eclipse IDE, IntelliJ IDEA, JIRA, Confluence, TestRail, Postman, SOAP UI

■ Operating Systems & Commands

UNIX commands for server-side and log analysis

Dortmund
