## Education

2018/10 – 2022/07 Rawalpindi, Pakistan	<b>Bachelor of Science in Computer Science</b> <i>Arid Agriculture University</i>
2016/07 – 2018/06 Rawalpindi, Pakistan	<b>Fsc Pre Engineering</b> <i>Superior College</i>

## Professional Experience

2024/09 – present Islamabad, Pakistan	<b>Full Stack Next js Developer</b> <i>Bredwares Technology</i> <ul style="list-style-type: none"><li>• Hands-on experience in developing scalable web applications using React and Next.js.</li><li>• Proficient in both server-side and client-side rendering with Next.js for optimized performance and SEO.</li><li>• Strong experience with SQL and NoSQL databases including MSSQL, PostgreSQL, and MongoDB.</li><li>• Worked with modern database platforms such as Neon for serverless PostgreSQL solutions.</li><li>• Practical knowledge of deploying and managing applications using Amazon Web Services (AWS).</li><li>• Experienced in deploying full-stack applications seamlessly on <b>Vercel</b> for production-ready hosting.</li><li>• Experienced in conducting thorough code reviews to maintain high code quality and consistency.</li><li>• Focused on delivering exceptional UI/UX by collaborating closely with design teams and applying best practices.</li><li>• Familiar with Supabase as a backend-as-a-service platform for rapid development and cloud integration.</li><li>• Collaborative team player, working closely with cross-functional teams to align development with business objectives.</li><li>• Committed to writing clean, maintainable code and continuously improving development workflows.</li></ul>
2024/01 – 2024/05 Rawalpindi, Pakistan	<b>Next js Typescript Developer</b> <i>Beyond Sol</i> <ul style="list-style-type: none"><li>• Spearheaded end-to-end development of modern web applications using Next.js with TypeScript.</li><li>• Led projects from planning and architecture to final deployment, ensuring robust and scalable solutions.</li><li>• Specialized in crafting dynamic, server-rendered applications for optimal performance and SEO.</li><li>• Emphasized strong TypeScript practices to improve code readability, maintainability, and team productivity.</li><li>• Ensured high-performance delivery by optimizing both frontend and backend workflows throughout the development lifecycle.</li></ul>

- Applied architectural best practices to build scalable systems tailored for long-term growth.

2023/08 – 2024/09  
Rawalpindi, Pakistan

### **Next js Developer**

*Konnect 247 Limited*

- Performed regular debugging, testing, and system maintenance to ensure ongoing application reliability.
- Developed and maintained backend services with Node.js and Express, enabling smooth client-server interaction through well-structured REST APIs.
- Worked closely with designers, QA, and product stakeholders to translate requirements into functional and timely deliverables.
- Engineered a modular and responsive CRM interface using React and Next.js, delivering an intuitive user experience.
- Followed modern frontend best practices including reusable component structures and modular design systems.
- Reviewed pull requests and mentored peers to uphold clean code standards and maintain project quality.
- Designed efficient and scalable MongoDB schemas, with a focus on performance and optimized querying.
- Created comprehensive technical documentation covering APIs, system architecture, and deployment steps to support team continuity.
- Integrated secure authentication flows utilizing technologies like OAuth2 and JWT for protected user access.
- Enhanced system performance through careful profiling, code refinement, and architectural adjustments.

2023/02 – 2023/09  
Rawalpindi, Pakistan

### **React/Next js Developer**

*Vizz Web Solutions*

- Maintained and enhanced mid-sized web applications with a strong emphasis on delivering smooth and consistent user experiences.
- Utilized Bootstrap and Tailwind CSS to design visually appealing, responsive, and accessible user interfaces.
- Applied advanced knowledge of Redux and Context API to implement scalable and maintainable state management solutions.
- Ensured pixel-perfect implementation by writing clean, efficient, and well-structured code.
- Committed to delivering high-quality features with attention to detail and user-centric design principles.

2022/07 – 2023/02  
Islamabad, Pakistan

### **Software Engineer**

*Codata Technologies*

- Designed and developed a government-focused website centered around natural disaster management and awareness.
- Built an intuitive and user-friendly admin panel for streamlined content and data management.
- Structured and maintained essential datasets related to various disaster types for quick access and organization.
- Ensured efficient data handling practices to support timely updates and accurate public information.
- Focused on usability, accessibility, and performance to serve both administrators and end-users effectively.

## Skills

---

### Programming technologies

Javascript, Typescript, C#

### Frontend Technologies

Html, Css, Js, React,

### Styling Frameworks

Tailwind css, Bootstrap

### Component Libraries

Shad Cn, Radix, Chakra, Material Ui, Ant Desig, Headless Ui

### Backend Technologies

Node js, Express Js, Supabase, Firebase

### State Managment

Redux Toolkit, Zustand, React Query, Context api

### Authentication Libraries & SDKs

Next Auth, Clerk, Auth.js, Firebase Auth, Supabase Auth

### CI/CD & DevOps Tools

Git/Github, Aws, Azure, Gitlab, Vercel, Netlify

## Languages

---

• English

• Urdu

## Certificates

---

### Responsive Web Design – freeCodeCamp

Gaining hands-on experience in building responsive, accessible websites using HTML, CSS, and Flexbox/Grid.

### React.js Essential Training – LinkedIn Learning

Learning core React concepts including hooks, component lifecycle, and state management with real-world examples.
