  - Developed a console-based Race Car Game in C++ using OOP principles.
  - Implemented grid-based movement, collision detection, and score tracking.
  - Designed features like coin/trophy collection, obstacles, and replay functionality.

## Professional Summary

I am a software engineering student at UET Taxila with a strong interest in web development. I have good experience in creating modern and responsive websites using HTML, CSS, JavaScript, and React. I have built different types of projects, such as online stores, personal portfolios, and video apps. My websites are user-friendly, mobile-friendly, and load quickly. I also use tools like GitHub and Firebase to manage and improve my work. I always focus on writing clean code, meeting deadlines, and making sure clients are satisfied. I enjoy learning new skills and working on creative projects.

## PROFESSIONAL EXPERIENCE
