Profile

I'm a passionate Full Stack Developer with 1 year of experience specializing in the MERN stack (MongoDB, Express.js, React, Node.js). I focus on building scalable, responsive web applications that offer smooth user experiences. With a solid understanding of both front-end and back-end technologies, I create end-to-end solutions that meet client needs. I thrive in team environments, always learning and staying up-to-date with new tech.

Professional Experience

01/2024 – present	Full Stack Developer, Sky Pulse Solution <ul style="list-style-type: none">Designed and developed scalable web applications using the MERN stack, increasing user engagement by 30%.Created seamless user interfaces and optimized backend systems, reducing page load times by 20%.Integrated APIs, improving functionality and expanding features, which led to a 15% increase in client satisfaction.Collaborated with cross-functional teams to deliver responsive, high-performing solutions, resulting in a 25% boost in overall application efficiency.	Rawalpindi
03/2023 – 2024	Freelance Web Developer, Fiverr <ul style="list-style-type: none">Designed and built custom websites and web applications, including WordPress sites, increasing client revenue by 40% through improved online presence.Specialized in the MERN stack and WordPress, delivering responsive, high-performance solutions, reducing development time by 35%.Tailored each project to client needs, enhancing user experience and boosting client retention by 50%.	

Education

10/2020 – 08/2024	BS Computer Science, BIMS Affiliated with PMAS Arid Agriculture University	Rawalpindi, Pakistan
03/2018 – 07/2020	ICS, Allama Iqbal Model College, Islamabad	Islamabad, Pakistan

Projects

Ecommerce APIs with Payment Method

Developed robust eCommerce APIs with Stripe integration for secure and seamless payment processing, enabling efficient order management.

News App APIs

Designed and implemented APIs for a News App, enabling real-time news updates, category filtering, and user-friendly content management.

Food App Admin panel with firebase backend

Developed an admin panel for a Food App with a Firebase backend, enabling real-time data management, user interactions, and efficient order tracking.

Loan Eligibility Checking web App

Created a Loan Eligibility Checking web app, allowing users to easily assess loan eligibility through a dynamic form and real-time validation based on user inputs.

Chat web App

Developed a real-time Chat Web App, enabling seamless communication with features like instant messaging, user authentication, and message history using WebSocket and backend integration.

SAAS School Management System

Built a SAAS-based School Management System with distinct user roles: Super Admin, Admin, Teacher, and Student. The system allows efficient management of school operations, including student data, timetables, grades, and communication across all user levels.

Karyana App Admin panel

Developed an admin panel for a Karyana App, enabling efficient management of products, orders, and users. A key feature was the real-time Ledger module, which I designed to accurately track financial transactions (credits and debits).

Certificates

Penetration Testing and Ethical Hacking Certification from Cybrary

Gained expertise in identifying vulnerabilities and securing systems through ethical hacking techniques and penetration testing. This certification enhanced my skills in assessing network security, exploiting weaknesses, and implementing robust defense strategies.

Introduction to Ethical Hacking from Great Learning.

Acquired foundational knowledge in ethical hacking, learning techniques for identifying and mitigating security risks. This certification strengthened my understanding of network vulnerabilities, security protocols, and ethical hacking practices to protect systems from potential threats.
