pipelines, AWS.

Experience

Codes Thinker, Bahawalpur

MERN stack Developer. 6.Sep.2024–21.feb.2025

- Developed and maintained full-stack web applications using MERN stack. Improving frontend performance by 25% via React optimizations techniques.
- Designed scalable RESTFUL APIs with Node.js/express.js, reducing latency by 30% with caching methods and query optimization.
- Integrated Third party APIs and services with Authentication and RBAC (role-based access control).
- Led a team of 5 interns to build a custom CMS dashboard with redux toolkit for centralizing state management.

BioTechWallah—Lucknow(remote)

MERN & Laravel Developer. 26.feb.2025– present

- Built **responsive UIs** with React.js and Tailwind CSS, achieving 95+ Lighthouse scores for performance and accessibility.
- Collaborated in Agile teams to deploy apps using **Git version control** and **CI/CD pipelines**.
- Troubleshoot and debugged legacy systems, improving application stability by 20%.
