

Muhammad Haris

Full Stack Web Developer

   +92-301-0818348

Profile Summary

Full Stack Developer with hands-on experience in React.js, Node.js, TypeScript, and MongoDB, skilled in building scalable web applications with modern UI/UX practices. Proven ability to develop, deploy, and maintain full-featured projects, including real estate platforms, school management systems, and e-commerce sites, both independently and in collaborative team environments.

Strong foundation in frontend and backend technologies, version control, and RESTful APIs, with a keen focus on clean code, responsive design, and optimized performance. Effective communicator equipped with industry experience, certified in frontend development, and committed to continuous learning and real-world impact through code.

Experience

Freelance
