Results driven developer with experience in building and scaling modern web applications. Skilled in creating responsive, user friendly interfaces and developing robust backend systems. Proficient across the full development lifecycle from turning ideas into functional solutions to integrating APIs and enhancing performance. Passionate about writing clean, maintainable code, solving challenges with innovative approaches, and delivering seamless digital experiences that drive business success.

Work Experience

Global Digital Solutions [\(View Proejcts\)](#)

2024- Present

- Built web portals and tools using PHP, Tailwind CSS, and MySQL with a focus on UI and backend logic.
- Deployed and managed websites on shared hosting and VPS servers, including SSL and domain setup.
- Integrated payment gateways, email verification, and automated email workflows on live websites.
- Created web scrapers to automate data collection and storage in SQL databases, enhancing backend automation.

Zepto System Limited [\(View Proejcts\)](#)

2023- 2024

- Strong grasp of frontend and backend architecture, with a focus on building scalable, maintainable web applications.
- Proficient in state management, RESTful APIs, and MongoDB, delivering high-performance solutions.
- Effective team player with solid Git/GitHub knowledge, quick adaptability, and a commitment to clean, efficient code.
- Passionate about crafting intuitive user interfaces and improving overall user experience (UX).
- Continuously learning new tools and frameworks to stay current with modern web development best practices.
